Photo shot list

The one buyers see first

For a motorhome: Stand at the front corner on the side with the main door, so you can see the front and the whole side. Take about four big steps back. Hold your phone sideways at chest height, level, on the normal 1x camera. Fit the whole motorhome in, with a little sky above the roof and a little ground below the wheels.

For a touring caravan: Stand at the front corner on the side with the door, so you can see the front, the A-frame and the whole side. Take about five big steps back. Hold your phone sideways at chest height, level, on the normal 1x camera. Fit the whole caravan in, from the hitch to the back corner, with a little ground below the wheels and the jockey wheel. Leave it unhitched and level.

Before you take it

- The whole motorhome or caravan is in the photo, with space all round it.
- Nothing is in front of it or touching it: no car, bin, bike or person.
- The doors, windows and roof lights are closed and the step is in.
- Your phone is level, at chest height, on 1x, with no zoom.
- If the sun's out and strong, wait for a cloudy spell.
